

## Important announcement

<Uji and Kyoto are safe>

Since Kyoto and Uji have not suffered from the earthquake, tsunami or radioactivity, our family is completely independent of radioactive contamination and everyday lives are going on normally as always. Transportation system including access to and from Kansai Airport and accommodation facilities in Kansai are functioning quite normally. Also the World Heritage Byodoin Temple and scenery around look as beautiful as ever.

<Uji Tea safety reasons>

Our tea we sell in our shop just comes from tea fields from and around Uji in Kyoto. Delivered in vacuumed stored in a cold storage room in our own warehouse, just the required quantities of tea is processed by us and therefore we guarantee the products safety. Also the City of Kyoto confirmed on the 16<sup>th</sup> of May that there is no radioactive pollution in tea from Uji and Kyoto.

Last but not least a big quantity of our tea was harvested before the Fukushima accident and so there is no radioactivity in this tea.

<Tea ceremony experience >

In our shop, you have the chance to enjoy a tea experience including making your own Macha green tea powder and learn how to drink it correctly. Starting from small groups you can enjoy a simple experience of making the Japanese tea ceremony. Just make an reservation by mail and enjoy a wonderful experience in Uji.
